PROFILE

Senior Mobile App Developer with over 5 years of mobile development experience specializing in Flutter and Dart. Expertise in architecting and delivering scalable iOS and Android applications with pixel-perfect UI, integrated Firebase services and CI/CD pipelines. Proven ability to lead end-to-end feature development, manage releases on App Store and Google Play, and collaborate across teams to drive user-centric experiences.

LANGUAGES

- Hungarian (native)
- English (C2)
- Romanian (C1)
- German (A1)
- Portuguese (A1)

WORK EXPERIENCE

Freelancing

2023 - Present

Freelancing and short term consulting experience

Budapest, Hungary

- Contracting (2026): Developed a multiplatform desktop-based browser multi-window application in Flutter with modular app architecture and responsive UI design, including auto-update functionality
- Contracting (2026): HOAX (Social Café app): Led a full redesign and implemented pixel-perfect interfaces, integrated Stripe Payment API, GPS-based venue locator, loyalty based program with discounts, and personalized badges, feeds, while improving performance, security and accessibility
- HelixSoft (2023-24): UI/UX Design experience:
 - * Designed Company Logo - in collaboration with the founder and co-founder
 - * Designed Mobile screen mockups, assets, prototypes
 - * Wireframes & Wordpress implementation for Website - Sahara Group

Trendency Online Zrt.

Mar 2024 - Present

Experienced Mobile Engineer

Budapest, Hungary

- Developed various scalable mobile apps in news, media, communications, and entertainment using Flutter, ensuring pixel-perfect UI design and leveraging best practices in mobile app development
- Integrated Firebase services (Realtime Database, Firestore, Analytics, Crashlytics) in multiple apps enhancing app performance and reliability.
- Maintained existing native Android, iOS, and Flutter apps by fixing bugs, optimizing runtime performance, and managing end-to-end bug tracking processes
- Integrated SDKs: Android auto, CarPlay, Apple Health SDKs, Consent Management tools and other third party SDKs.
- Contributed in team-wide code reviews enhancing team cohesion and collaboration.
- Released multiple Flutter apps to both Google Play and the App Store, managing App Store release management and Google Play release management workflows to achieve 20K downloads and a 50% improvement in user ratings
- Refactored outdated codebases to use industry standards and popular best-practices, improving app quality, usability, UX and store statistics (download rate, ratings and app satisfaction)
- Actively participated in the planning, design, development and release processes of an internal desk booking application using integrated Microsoft Exchange APIs, developed with Riverpod state management and Firebase as BaaS (Cloud Firestore, Auth and Functions)
- Implemented CI/CD pipelines using GitLab CI/CD and Fastlane, and configured GitHub Actions workflows to automate deployments for Flutter projects
- Used Github Actions workflows to deploy Flutter web projects
- Documented features and technologies used by the team to provide a clear guideline to our testing team - Maestro test automation, Accessibility in Flutter, GoRouter vs AutoRoute
- Improved app accessibility level by implementing best practices, followed by a complete audit & documentation that was reviewed by the UX team and iterated after improvements
- Improved the internal Flutter template upgrading the framework SDK and using Riverpod state management to speed up development startup time of new projects and minimize project costs
- Leverage AI development tools and agents to automate repetitive tasks-including in-app localization, security audits, and accessibility testing-improving development efficiency

Deutsche Telekom ITSH

Oct 2022 - Mar 2024

Medior Flutter Engineer

Budapest, Hungary

- Development of various internal mobile applications for iOS & Android platforms (Sustainability) - EcoShift

- Development of responsive and adaptive web, mobile and tablet application with Flutter for internal use
- Focus developing apps with high level of Usability & Accessibility using Accessibility debugging tools in XCode to achieve high User Experience levels
- Implementing custom widgets, beautiful animations and transitions that elevate User Experience
- Integrate backend services via REST API, using Riverpod state management enhancing app performance and reliability, reducing system runtime by 25%
- Architectural decisions in the projects, choosing state management solutions and dependencies - Riverpod, BloC, GetIt
- Documenting software development process, code and flows - present the documentation using flow charts and clear examples
- Mentored Android developer colleague to use Flutter best practices and tools with parallel debugging sessions

APPFORTÉ

Oct 2020 - Oct 2022

Flutter Developer

Targu Mures, Romania

- Develop a blockchain based NFT marketplace application on Android & iOS devices for the Hungarian National Bank (MNB)
 - Integrating app features via REST API, CLEAN architecture with BloC state management, GetIt dependency injection
- Manual Publishing of iOS & Android apps to their respective stores, achieving market goals and reachability metrics.
- Develop features for internal mobile applications, minimal configuration of mobile CI/CD pipelines using Azure decreasing deploying time and increasing release efficiency and static code analysis
- Designed UI/UX using Figma and developed a complete Telemedicine app dashboard having a patient management system using Flutter Web as a PWA
- Mentored colleague to use Flutter best practices and coding tools more efficiently.
- Completed UI/UX design tasks - Design small scaled mobile apps and responsive web app

EDUCATION

Sapientia EMTE University

2017 - 2021

BS, Computer Science

Targu Mures, Romania

PROFESSIONAL CERTIFICATES

- Principles of UX/UI Design: 2023, June, Coursera
- Meta iOS Developer (iOS+Swift): 2023, June, Coursera
- Google UX Design Professional Certificate: 2021, December, Coursera
- Image Processing with Keras in Python: 2020, June, DataCamp
- Cleaning Data in Python: 2020, March, DataCamp
- 6 hours of Python Programming Bible: 2019, October, Udemy
- 6 hours of HTML and CSS for Beginners: 2019, February, Udemy

INDUSTRY KNOWLEDGE

- **Mobile App Development & Design:** Flutter & Dart, Android Studio, XCode, Mobile App Development, UI & UX Design, Pixel-perfect UI Design, responsive, adaptive UI, Figma, Adobe XD, Rive, Rive Animations, FVM, Fastlane
- **Frameworks, Languages & Emerging Technologies:** Dart, Kotlin, C# - Unity, Python - PyQt, Arduino, IoT, AI Development Tools
- **Architecture & State Management:** App Architecture, State Management, SOLID principles, Clean Code, OO programming, Reactive programming, Riverpod, BloC, GetIt, GoRouter, AutoRoute
- **Testing, CI/CD & Deployment:** Automated Testing, Unit Testing, Integration Testing, Widget testing, Maestro test automation, CI/CD Pipelines, Gitlab CI/CD, Github Actions, workflows, App Store Release Management, Google Play Release Management, Bug Tracking
- **Tools & Technologies:** Git, Jira, Confluence, Firebase, REST, GraphQL, Pigeon, Dart FFI, AI Integration, GROQ LLM
- **Other Skills:** Problem-solving, Critical & Creative Thinking, Troubleshooting
